

CEL would like to take this opportunity to thank all our abutters for their cooperation and understanding during the construction of our new electrical substation on Jacob Street and the transmission lines from Ingham Street to the new substation. The major construction has been completed with only some minor “clean-up” work to be done over the next 3-4 months. This work includes the removal of the temporary overhead pole line running along the south side of the right-of-way and landscaping at and around the substation site on Jacob Street.

From the beginning, we stated we were committed to minimizing the impact and inconvenience to you, our customer - we hope we met your expectations.
